

## Supertraverse DGT Waypoint List

With thanks to Stijn Laenen

**Important: all waypoints are in the CAPE datum (NOT the default WGS84)**

- This makes it easy to read them off the official berg maps which are mapped in CAPE datum.
- They're all in hdddmm.mmm format
- The waypoints marked with asterixes (\*) were measured off the map and should be accurate to about 50m. All other waypoints were marked at the actual locations.
- The waypoint names (where not self-explanatory) are usually grid references for the official berg maps. These waypoints mark significant things (saddle, peak, river, etc.) in that block on the map.
- Some of the waypoints are intended for reference only - use your maps in conjunction with the GPS points to ensure you stay on route.

1.	Chain Ladder	S28 44.794 E028 52.828
2.	Mont-aux-Sources	S28 46.309 E028 52.403
3.	G28*	S28 47.205 E028 53.606
4.	G31*	S28 48.811 E028 53.636
5.	J35*	S28 51.000 E028 55.266
6.	M39	S28 53.345 E028 58.198
7.	Q42*	S28 54.568 E028 59.523
8.	S42*	S28 54.865 E029 01.031
9.	T43	S28 55.463 E029 01.659
10.	W43	S28 55.329 E029 03.686
11.	Y45*	S28 56.351 E029 04.338
12.	AD49	S28 58.543 E029 07.265

61.	Bushman's Nek Police Post	S29 50.630 E029 12.750

**Disclaimer:** these waypoints were copied with due care and have been used by Hiking South Africa's contributors to hike the DGT. This does not however implicate that hikers can rely solely on these waypoints – they should only be used in conjunction with the KZN Wildlife Drakensberg Hiking Maps (numbers 1 to 6; scale 1: 50 000) and **independently verified** by plotting them on the map. Hiking South Africa will carry no liability for the incorrect use of these waypoints.
